INDEX

Sr. No.	Name of Practicals	Date	Remark	Sign
1	To study the Private Key and Public Key cryptographic systems.	6-8-2026		
2	To study the classical encryption techniques: substitution and transposition.	13-8-2026		
3	To study prevention mechanisms to avoid viruses and other malware on a PC.	20-8-2026		
4	Demonstrate the use of network tools: ping, ipconfig, ifconfig, tracert, arp, netstat, and whois.	3-9-2026		
5	Perform encryption and decryption of Caesar cipher and write a script for these operations.	10-9-2026		
6	To study a real-world data breach and analyze its impact on the Confidentiality, Integrity, and Availability (CIA) Triad.	23-9-2026		
7	Study a mobile application security breach and identify threats such as data leakage, rootkits, or unauthorized access.	30-9-2026		
8	Illustrate different types of security attacks and map them with appropriate security services and mechanisms.	7-10-2026
